

HANDI SHELF

The Handi-shelf is perfect for storing rods of glass. The four aluminum shelves are separated into eight sections. Each section is angled towards the center of the shelf to keep the glass from rolling. Each section also has lips on both the inside and the outside to ensure the safety of the glass. The top brace of the frame makes a perfect handle for easy transport. The multiple shelves make separating different types of glass a cinch and are spaced for ease of use. Approximate dimensions for the Handi-shelf are 12 inches by 12 inches by 14 inches high.

WORK TABLE

Glass working Table
31B002-0000

The glassworking table is constructed of a sturdy stainless steel top and painted steel legs. It is available with two inlets and four metered outlets on the gas distribution panel providing for convenience and versatility. Many configurations of multiple tables are convenient due to its trapezoidal shape; six tables fit perfectly in a "circle" offering an ideal teaching configuration. Approximate dimensions for the table are 56 inches along its front edge, 34 inches in depth, and 30 inches in height.

6 Glassworking tables form a perfect hexagon
